

Edward Nunez

Software Engineer

SUMMARY

Focused and quick-learning Software Engineer. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

October 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management
- Developed HTML, CSS, JavaScript, and express pages for user interaction
- Reviewed code and conducted testing for 3 additional features on web app that increased contributions
- Tested software for bugs and operating speed, fixing bugs and documenting processes to increase efficiency
- Produced detailed design documentation, unit test plans, and documented code clients
- Troubleshooted code-related issues and defects

Recent Projects:

Feeder League (Fullstack Web App) – App to see NBA 2k22 stats

Covid 19 (Fullstack Web App) – My learning was focused on creating an app to track Covid-19 cases using React and Api

Other Projects: Small Lakes Casino Virtual Slot Machine, Los Angeles StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Onboarding Specialist at CloudKitchens | Los Angeles, CA

August 2021 — Present

- Demonstrate extensive field knowledge through efficient problem resolution
- Research solutions through computer database
- Maintain operational efficiency through following proper office protocols
- Work with the customer solutions team to provide expert level technical support to customers by querying databases (MySQL), developing complex scripts, reviewing code, and examining logs
- Restore customer data from backups and logs
- Debug customer-specific errors and report these to developers using JIRA and serve as an interface for communicating progress between developers and clients
- Maintain and update the technical knowledge base in Confluence
- Manage crisis situations during app downtime or feature failure
